Whitby Area Scout Trucks Competition

18 Wheelers

Rules

Overall length cannot exceed 44.5 cm.

Overall width cannot exceed 8.5 cm.

Overall height cannot exceed 11.5 cm.

Overall weight cannot exceed 800 grams (the scale at the track is final).

The axles cannot be altered (otherwise the wheels will not fit on the track).

The truck must be in two sections (a cab and a trailer) and the connection between them must pivot freely.

The truck can be made of anything as long as the dimensions are followed and,

The wheels that come with the kit(s) 10 or 18 must be used and all of them must be in contact with the track.

These dimensions will be strictly enforced because otherwise the trucks may not fit on the track or damage it. There is no minimum weight, however if the truck is significantly less than 800 grams it will be at a disadvantage on the track.

The objectives are to have fun and be creative in the design.
